

- .NET 10 Preview & C# 12
- ASP.NET Core (Minimal APIs & Razor Pages)
- Database Design & Implementation
- Surreal DB & DataStar (including documentation exploration)
- Lucene.NET for advanced search functionality
- Modern Frontend Development (HTML, CSS, JavaScript)
- Tailwind CSS for responsive UI design
- Web scraping and data collection for market research

Projects:

- **Blog Platform:** A file-based blogging system featuring content filtering, search, pagination, post creation, scheduling, drafting, editing, role-based authentication, and an admin dashboard with analytics and privileged actions.
- **Feathers:** An export platform for Egyptian mattresses, providing shipment process guidance, supplier product catalogs, a complete e-commerce system with cart functionality, and a supplier contact form for direct inquiries.

For further information, please contact Dody Gunawinata, the lead mentor of this internship program, at dodyg@silverkeytech.com. He is the technical co-founder of SilverKey Technologies and a leading voice in the issue of training for ASP.NET Core-related technologies globally via <https://github.com/dodyg/practical-aspnetcore>.

Sincerely,
Rime Elfawal
